Brands not mentioned - 6-10 years

Generally these are limited life span seats. Valid for up to 6 years from the date of manufacture - assume a 6 year life span unless the shell is embedded with a manufacture expiry date, with the exception of those listed in the table above. The expiry date can be taken from the date of sale (Britax & Safe-n-Sound), others are always from the date stamp on the seat shell.

NOTE:

- All car seats, boosters and harnesses expire - there's no exception to this rule
- Seats/brands may be new to the market and not yet added to the table, they may not be listed, as often they are re-branded models of other seats above or they may change brand names frequently.
