

360 cup how-to guide

how to use

drinking

twist the handles down to expose the rim for drinking mode. kids can sip from anywhere around the rim using the lip-activated soft silicone seal to control the flow. the silicone seals closed when not in use, so it won't spill if bub tips too far. so handy for little learners!

travel mode

twist the handles up to lock and go for travel mode. The rim is completely sealed so it won't leak in your bag or pram.

how to fill

-  twist handles down in drinking mode
-  twist the clear top anti-clockwise to remove
-  fill your cup to the max line
-  then screw the top back on for drinking mode

so handy for little learners!

how to pull your 360 cup apart

- twist handles down in drinking mode
- twist the clear top anti-clockwise to separate from the cup
- remove the silicone seal from the top
- twist the handles up and all the way off the cup

how to clean

twist the handles up to lock and go for travel mode.
The rim is completely sealed so it won't leak in your bag or pram.

how to put your 360 cup back together

- attach the handles to the cup by aligning the cup pins and handle grooves.
- twist the handles anti-clockwise in a downward direction onto the cup
- stretch the silicone seal onto the clear lid, making sure the arrows on the inside of the seal and the arrows on the outside of the lid are facing the same way.
- push the seal into place so that the thicker, lower part of the seal sits neatly in the lid's groove labelled 'bottom of seal'.
- twist the lid clockwise onto the cup.
